

## **GETTING STARTED**

Dear Salon Professional,

*The Geo Palette Hair System Educational Program* has been developed for the licensed professional to achieve a clear understanding and the successful implementation of the System in the shortest period of time. We begin the education program as a Geo Palette Color Artist with Color Component Level I. The color aspect is easier to see, easier to follow and easier to understand, making it an optimal place to start.

In Color Component Level I, three modules are available for your choice: The Essentials Module, The Essentials Plus Module, and The Premium Module. All of the modules deliver the same education and certification process, with DVDs, resource binder, and registered access to the Geo Palette professional website for distant learning, any time, any place, at any pace. The difference between the individual Modules is investment cost outlay, which pertains to the quantity of specific items included in the initial purchase. The Module order page will list the pricing and all items included in each unit. The biggest savings and value for your investment is in the initial purchase of any of the Modules, detailed under the title and price on their respective description page.

To begin, download the application for the education and fill it out completely. The minimum deposit, which will be credited toward your purchase, along with a copy of your current cosmetology license, must be included and delivered to the company via email, regular mail, or fax. Upon receipt, we will begin processing the order and application.

There is a four to six week delivery date. You will be contacted to remit the balance due, plus shipping and handling. All orders must be paid in full before your order is sent. Full payment at the time of the application and order submission will expedite your purchase. Any questions about the program purchase, call 516 374-1490, fax 631 385-1436, and ask for Jude, contact us on [www.geopalette.com](http://www.geopalette.com) or message us on F/B at Geo Palette.

Wishing you fun and success!

Thank You,

*George Mennella*

*Creator and Inventor of the Geo Palette Hair System*
